

Thank you for buying the Decoy Grenade!

If you have any questions about the product don't hesitate to contact me through Etsy. Please leave a review on Etsy on what you think about the product. Also feel free to check out my other products on Etsy.

Package contents:

Assembly / Installation:

In order to assemble the decoy grenade, you put the pieces together as shown in the picture to the left.

Start by putting the cap on top of the base of the grenade, and then **carefully** place the grenade arm on the cap, starting with the two hooks (these are fragile and can easily break if not careful).

Then proceed to insert the grenade pin. Since these are thin and also fragile, I've included 3 in the package.

Optional steps: To ensure the grenade stays together you can glue the cap and the base together. It is also possible to fit a small spring on the tab underneath the arm in order to get the arm to pop off when released. This is not recommended as the grenade is made for display only.

I hope you enjoy the product!

Best regards
